For BMW M30B35 4340 Forged Steel Connecting Rod Description

Our Connecting Rods for BMW M30 B35 are made of forged 4340 steel and are super strong. These are 135mm long, the correct length for standard M30 engines. They are doweled for perfect alignment and are balanced to within +/- 1gram . these BMW M30 2.0L Forged Steel Racing Connecting Rod use the proven X beam pattern, CNC machined, careful quality controlled, polished cheeks, a very good strength to weight ratio and overall quality. Unlike many rods that need lots of work in the machine shop to meet the proper wight and clearance tolerances, hurricane Components BMW M30 forged connecting rods are balanced,

trueness finished, and pre clearance. This means less time in the machine shop, and a rod that is a true value. If your building your M30 for Forced Induction or high RPMs and you want to do the job right without breaking your budget, consider our BMW 135mm race connecting rods m30 b35 for reliable strength.

Note: This is the picture after milled X beam bmw connecting rods progress. for more production progress, please check our news page: [Hurricane High Performance connecting rods - Process of machining rods](#)
