Chevy SBC 283 327 Connecting Rods Description

Firstly , all these chevy sbc 283 327 connecting rods forged from high tensile 4340 steel material , but not all 4340 steel connecting rods are same, Hurricane always use top quality 4340 material. All the Hurricane 4340 steel connecting rods heat treated with 34-38HRC and forged as Hurricane strict technical system to meet high quality standard.

Secondly , these rods built as I-beam shape which can handle extreme engine loads to meet your needs of high engine horsepower. Of course , if you are interested in more beam designs , please click [here](#) to view a article of Hurricane hot sell beam designs on conrods. If you can not find the beam style you like , please feel free contact us online or email to marketing@hurricane-rod.com.cn. Our experienced staff will be very willing to help you .

Thirdly, per sbc rod polished and shot peened at Hurricane factory to stress relieved for high fatigue strength. On one hand , it makes the I-beam rods be more reliable in the racing industry; On the other hand, it helps to make the rods' surface become more bright , smooth and beautiful .

Finally , you could click here to watch a factory video at our website [Home page](#) , then you can see Hurricane is different compared with other rods supplier in market , we have our own connecting rods factory in Chengdu , Sichuan , China and have 20+ years' experience . All the staff at the Hurricane team trained well , they can answer and deal with much sales , marketing and technical questions to make you obtain good service .
