Honda K24 Connecting Rods Main Sizes

Brand: Hurricane	PE wi	dth: 0.780"
Center to Center Length: 151.99mm/5.984"		
Big End Bore Diameter: 51.006mm/2.008"	5.984*	
Big End Width: 19.8mm/0.780"	Rod Length: 5.984*	
Small End Bore Diameter: 22.015mm /0.867"	000	
Small End Width: 19.8mm/0.780"		
Beam Style: H-beam	BE width: 0.780"	

Performance Connecting Rod for Honda K24 More Details

Connecting Rod Bolt Diameter	3/8 "
Approximate Connecting Rod Weight	~
Advertised Horsepower Rating	600hp
Package	4 pieces per set
Material	Forged 4340 steel
Connecting Rod Finish	Shot-peened, Polished
Pin	Bronze wrist pin bushings
Wrist Pin Style	Floating
Cap Retention Style	Cap screw
Weight Matched Set	Yes Balanced +/- 1g
Magnafluxed	Yes
Private Label	Yes ,available
Custom design	Yes, accept

Forged Honda K Series Connecting Rods Features

The strength of rod will depend on the alloy and heat treatment, the design of the rod, its thickness, dimensions and weight. All hurricane rods made from forged steel 4340 for many engines, and heat treatment make HRC get to 34-38.

1. SHOUDLER

Increase strength of shoulder, combine bolt strength and rods length perfectly.

2. RIBBED PIN END

Ribbed pin end surround helps to maintain pin bore roundness and avoid PE distortion in high engine speed applications.

3. Double oil holes at the small end

To provide more lubrication to the bushing in small end, Hurricane assembled double oil holes at the small end, so that the oil will drip during the piston's compressing cycle.

As well as custom rods (forged or billet) that can be made to order with three ways:

- 1. Sample sent to us directly, address: Middle Ring Shuangjing Rd Chengdu Sichuan 610081 China
- 2. Full drawing to our email: marketing@hurricane-rod.com.cn
- 3. Fill in your requirement at our **Custom Form**
