MAZDA MIATA 1.6L/1.8L H beam connecting rods Description

As a general rule of thumb, H-Beam Rods should be suitable for an engine making up to 175hp per rod, which will cover all but a few Miata engines. With that in mind, these Hurricane rods are more than enough for your Miata, whether it's naturally aspirated or forced induction! The way we see it, installing H-Beam rods is a small investment that will ensure your engines bottom end is prepared for whatever you might throw at it in the future.

And all Hurricane steel H-beam connecting rods for Mazda engine are made from forged 4340 steel alloy. Each rod set is weight-matched to matched to +/- 1g. They're packed full of performance features, such as a compact uniform-grain structure for ultimate strength, full machining, stress relieving, and magnafluxing. the wrist pins get a bronze alloy bushing and alignment sleeves are used for durability and precise cap location. Sizing is performed on the unique Sunnen Krossgrinding system for a perfect housing bore. These 1.6 Miata connecting rods compatible with the 90-05 Miata both 1.8 and 1.6L engines. These are the perfect choice for engines up to 750 hp.
