Hurricane carries a full line of high performance, high strength crankshafts from top makers. Lightweight cranks are all the rage for their ability to let an engine rev quicker. Lightened cranks are sought after for racing applications where the reduced mass allows better engine acceleration. Forged 4340 steel crankshafts are available for your engine building and performance needs.

4.100" Stroke GM Small Block 350 Forged Crankshafts Pictures

The Chevy 350 small block forged cranks flank and outline have been machined and shot peened, increasing the intensity effectively
